Job Description

The University at Buffalo [Department of Pediatrics](#) is recruiting for a cluster hire of 3-5 individuals who can add depth and breadth to strengthen research on the promotion of healthy lifestyle behaviors and prevention and treatment of pediatric obesity and related health problems.

We are looking for faculty at Assistant, Associate, and Full Professor levels who are interested in translational research that can range from translation of basic science to dissemination and implementation science, building on existing strengths. Faculty at all levels would be expected to develop and maintain an active research program.

Building on UB's strength in collaborative and translational research, we seek to hire a colleague who values a collaborative work environment.

The candidates will be able to take advantage of already established collaborations within the department and the university at large, including the UB Center for Ingestive Behavior, as well as collaborate in the development of innovative interdisciplinary programs of research. The candidate will also help in mentoring faculty and/or trainees, and provide research design and statistics expertise to the Department.

About The University at Buffalo

The University at Buffalo (UB) #ubuffalo is one of America's leading public research universities and a flagship of the State University of New York system, recognized for our excellence and our impact. UB is a premier, research-intensive public university dedicated to academic excellence. Our research, creative activity and people positively impact the world. Like the city we call home, UB is distinguished by a culture of resilient optimism, resourceful thinking and pragmatic dreaming that enables us to reach others every day. Visit our website to learn more about the [University at Buffalo](#).

University at Buffalo is an affirmative action/equal opportunity employer and, in keeping with our commitment, welcomes all to apply including veterans and individuals with disabilities.
