The Department of Internal Medicine at the University of Kentucky is seeking a faculty member to primarily focus upon the care of patients with adult congenital heart disease (ACHD) within the Division of Cardiovascular Medicine at the University of Kentucky Medical Center. In addition to the care of patients with ACHD, the faculty could be involved in a busy cardiac imaging program and could have to cover inpatient services (CCU, consult, floor) in general cardiology. Most all of these activities will include clinical care teaching activities with medical students, residents, and fellows.

Professional Development activities such as attending continuing education meetings, workshops, lectures, and other activities will be necessary to participate in the various missions of the Department, the College, and the University.

Please include an updated curriculum vitae when submitting your application. Applications will be reviewed upon receipt and will continue until the position is filled.
