Job Description

The Department of Toxicology and Cancer Biology is recruiting an Assistant Professor who has expertise in epigenetics, redox biology, cell signaling pathways, and/or metabolisms. This position will focus 80% on research, 10% on teaching, 5% on service and 5% on professional development initially. After tenured the candidate will be expected to support themselves 30% with research grants.

Please include a CV and cover letter along with application. In addition, please provide the names and contact information for at least three references when prompted in the application. This information may be utilized to solicit recommendation letters from your references within the employment system.

Applications will be reviewed immediately and continue until the position is filled.

The Department of Toxicology and Cancer Biology, in the UKY College of Medicine, has a long history of being an outstanding basic science department that interfaces closely with the Markey Cancer Center. Positions in the department include state-of-the-art research space and facilities, strong
