Job Description	

We are looking for highly motivated, enthusiastic individual dedicated to excellence to join our team as a Research Technician to support work on corneal diseases. [Dr. Sangita Patel's lab](#), [Department of Ophthalmology](#), at the University of Buffalo, is located at the Buffalo VA Medical Center. The cornea is the primary lens of the eye, and its clarity is crucial for good vision. Dr. Patel's lab studies the physiology of the corneal endothelium, the cell layer that maintains transparency of the cornea. There is an opportunity for growth as we will train the passionate candidate in the required skills

Key accountabilities and responsibilities - The successful candidate will support ongoing and new research activities in the lab including:

- Human eye dissections
- Preparing and maintaining cell cultures
