Posted Jul. 2, 2024, set to expire Nov. 3, 2024

The Department of Preventive Medicine and the Robert H. Lurie Comprehensive Cancer Center at Northwestern University Feinberg School of Medicine seek a full-time non-tenure-eligible Team Scientist at the rank of Assistant Professor. Responsibilities include collaborative research, and, when appropriate, pursuing extramural funding to support research on the molecular epidemiology of cancer, environmental and social risk factors for cancer, and cancer health disparities. Faculty will hold full faculty privileges, are eligible for promotion, and will collaborate with cancer population faculty members on grant applications, scientific publications, and conducting funded projects, as well as mentor students/fellows, and are encouraged to submit grants as PI or Co-I. Both independent and collaborative research are valued.

Qualified candidates will hold a doctoral degree (PhD and/or MD) in cancer or social epidemiology, or a related field. Strong candidates will have demonstrable expertise and original research in epidemiology, population science, translational research, and/or social disparities, in particular in underserved populations, as demonstrated by publications in peer-reviewed journals and collaborative experience with clinical or laboratory-based scientists, and active funded projects. Preference will be given to applicants who have experience in obtaining NIH or foundation funding, and experience in collaborative research in cancer disparities, as well as expertise in one or more of the following: cancer health disparities, social or environmental risk factors for cancer, epigenetic studies in cancer, longitudinal methods in cancer research, biomarkers of cancer and aging, and cancer epidemiology in underserved populations.

The Feinberg Division of Cancer Epidemiology and Prevention provides a unique, intellectually vibrant scientific home for researchers who study mechanisms of cancer and how to develop, implement and evaluate interventions to improve cancer epidemiology. Robust collaborations between the Chicago and Evanston campuses and the surrounding community support a full spectrum of basic science, translational research, and implementation science. Faculty access rich research resources including the Lurie Comprehensive Cancer Center and Northwestern Medicine Healthcare System.

The start date is negotiable and the position will remain open until filled.

When applying, please upload a CV and cover letter describing your interest and alignment with the position.

Northwestern University does not discriminate or permit discrimination by any member of its community against any individual on the basis of race, color, religion, creed, national origin, ethnicity, caste, sex, pregnancy, sexual orientation, gender identity, gender expression, parental status, marital status, age, disability, citizenship status, veteran status, genetic information, reproductive health decision making, height, weight, or any other classification protected by law in matters of admissions, employment, housing or services or in the educational programs or activities it operates. Harassment, whether verbal, physical or visual, that is based on any of these characteristics is a form of discrimination.

Northwestern University complies with federal and state laws that prohibit discrimination based on the protected categories listed above, including Title IX of the Education Amendments of 1972, which prohibits discrimination based on sex (including sexual misconduct) in the University's educational programs and activities. In addition, Northwestern provides reasonable accommodations to qualified applicants, students and employees with disabilities and to individuals who are pregnant.
