fellows and graduate and medical students.

Research or scholarship responsibilities may include establishing and maintaining an independent, extramurally funded research program at the intersection of some of the most dynamic areas in experimental oncology, including but not limited to functional cancer genomics and transcriptomics, genome editing, metabolism and proteomics, chemical biology, precision medicine, and cancer immunotherapy. Additional expectations include deepening and complementing existing strengths in genome integrity, mRNA metabolism, non-coding RNAs, tumor evolutions, and cancer neoantigens. Regardless of the chosen research area, the successful applicant will have sufficient postdoctoral or fellowship experience to demonstrate significant accomplishments, intellectual independence, and leadership promise.

The position is affiliated with the Division of Cancer Pathobiology and the Center for Childhood Cancer Research (CCCR) at the Children's Hospital of Philadelphia (CHOP). More information about the program can be found at <http://www.chop.edu/cccr/research-topic/cancer-pathobiology-research>. A generous recruitment package and wet laboratory space will be provided together with outstanding institutional resources, which include close ties to the clinical enterprise and easy access to patients' samples. Furthermore, as a CHOP-based Penn faculty member, the candidate will have access to the rich research environment and collaborative opportunities across the entire CHOP/University of Pennsylvania campus and Penn's Abramson Cancer Center. The Search Committee will be chaired by Dr. Andrei Thomas-Tikhonenko.
