## Posting Detail Information

### Position Summary

The laboratory of Dr. Daesung Shin at the [Jacobs School of Medicine and Biomedical Sciences-SUNY](#), Buffalo NY, is seeking an enthusiastic, self-motivated **Postdoctoral Associate** to join our team dedicated to the basic and translational research of lysosomal diseases and neuroinflammation. The lab is in the South Campus with access to cutting-edge resources and core facilities. Potential projects encompass the characterization of novel mutant animal and cell culture models showing cell autonomous effect of lysosomal enzyme deficiency in both central and peripheral nervous systems, and elucidation of anti-inflammatory mechanisms. Applicants should have demonstrated outstanding performance throughout their previous studies with their own publications. The successful candidate is a highly motivated and exceptionally organized team player with good communication skills.

### Learn more:

- Our [benefits](#), where we prioritize your well-being and success to enhance every aspect of your life.
- Being a part of the [University at Buffalo community](#).

*As an Equal Opportunity / Affirmative Action employer, the Research Foundation will not discriminate in its employment practices due to an applicants race, color, religion, sex, sexual orientation, gender identity, national origin and veteran or disability status.*

### Minimum Qualifications

A recent Ph.D. degree with background in molecular and cell biology is essential.

### Preferred Qualifications

- Experimentation in mouse genetics and histology are plus.
- A neuroscientific background is not necessary but is a plus.
