Program. Candidates may focus primarily on the educational mission of the department or may have a substantial interest in teaching, fieldwork/clinical practice coordination and supervision, admissions and/or research. Additional responsibilities include supporting the Program Director in the program's instructional, administrative and other functions.

Specific duties include, but are not limited to:

- Classroom teaching and course coordination
- Assess, review and advance research program and curriculum
- Oversee MSGC graduate research projects. Candidates may have responsibility in oversight of thesis work of the GC students.
- Assist with program admissions, marketing and recruitment
- Assist with program strategic planning, development and outcomes assessment
- Active Participation in conferences, seminars or meetings as required

### Minimum Qualification

Candidates must possess the following:

- Master in the discipline of genetic counseling
- At least 5 years of experience as a genetic counselor
- Experience in fieldwork supervision of genetic counseling graduate students
- The skills to take on major responsibilities for teaching courses and developing new curriculum, mentoring students.
- Overseeing student research and clinical training.
- Experience in the methods and technologies used in genetic research and aware of the ethical issues involved in research and publications.
- A commitment to the CMHS values of respectful dialogue, cultural humility, and promotion of health equity.
- Experience in genomics, public health genetics, and bioinformatics would be preferred.
- Good communication skills.

### Preferred Qualification

For appointment at the level of Assistant Professor, candidates must additionally possess all or most of the following:

- Previous involvement with a genetic counseling training program (i.e., leadership, teaching, clinical rotation oversight, etc.)
