Position Summary

The [Department of Pediatrics](#) at the University at Buffalo is seeking a dedicated **Research Assistant** for a community intervention for children with frequent asthma symptoms. Reporting to the Principal Investigator (PI) and the Senior Research Coordinator, the Research Assistant will support a four-year study and be responsible for recruiting and enrolling study candidates at school-based health centers in the city of Buffalo and providing student and parent asthma education. The preferred candidate will have excellent interpersonal and communication skills, and experience with children and families from communities that experience health inequities.

Essential Job Responsibilities:

- Recruit and enroll study participants, collect study data, and conduct follow-up evaluations.
- Obtain detailed knowledge of all components of study protocols; complete all study activities accurately and completely.
- Ensure appropriate informed consent processes are followed including discussion of treatment and intervention alternatives, and statements in the form are understood by study subjects and properly signed prior to the start of any study related procedure or treatment.
- Perform spirometry testing (after participating in an online training course).
- Perform home visits for enrollment if guardian is unable to meet at school.
- Assess and ensure subject safety throughout their participation in the study.
- Ensure that project recruitment goals and quality standards are met.
- Serve as primary contact for the patients and their guardians in clinical trial.
- Assist with data entry into electronic data capture system (REDCap).
- Monitor for protocol compliance. Record protocol deviations.
- Perform other study tasks as they arise.

This position involves local travel between study sites within the city of Buffalo. Use of personal vehicle is required. Reimbursement for mileage is provided.
