for the post of Research Assistant Professor.

The applicant should have (i) a PhD degree in Polymer Materials Science, Nanomaterials Science, Biomedical Engineering, or a related discipline; (ii) first-author publications in high-impact journals; (iii) a strong theoretical foundation and independent research capabilities; (iv) demonstrate innovation and commitment to cutting-edge research; (v) a high integrity, responsibility, diligence, and excellent teamwork and communication skills; and (vi) a proficiency in written and spoken English.

The appointee will work in the following research areas:

- 1. Fundamental and applied studies on mesenchymal stem cells (MSCs) and induced pluripotent stem cells (iPSCs);
- 2. Development of novel biomaterials and nanomedicines for regenerative medicine and disease therapy; and
- 3. Design and application of engineered exosome-based drug delivery systems.

The appointee will be expected to (a) develop and participate in independent/collaborative research projects; (b) seek external research grants; (c) supervise research assistants and students; (d) assist in laboratory management; and (e) perform other duties as assigned.

Appointment will initially be made on contract basis for up to three years, renewable subject to performance and mutual agreement.

#### **Application Procedure**

Applicants should submit the online application and attach (1) a curriculum vitae with a publications list; (2) a cover letter outlining motivation, research interests, key achievements, and peer recognition; and (3) full-text copies of 2-3 representative publications. Review of applications continue until the position is filled.

The University only accepts and considers applications submitted online for the post above. For more information and to apply online, please visit http://career.cuhk.edu.hk.
